Introduction

Thank you for purchasing V Expressions LTD's **TD-6 Elite Expansion Pack**!

TD-6 Elite Expansion Pack is 50 of the finest drum kits ever modeled for the Roland TD-6 drum module. What you will find in your new expansion are kits modeled to get the best acoustic and electronic sounds out of the module. 19 of the kits in this expansion pack have been modeled to reflect artist original recordings - matched as closely possible as the TD-6 drum module can achieve.

The **TD-6 Elite Expansion Pack** is a collection of kits that can be used by hobbyists, weekend warriors and professionals alike. With these kits, the professional gigging drummer can expand his or her library of custom kits to accommodate many variations of song lists as well as musical genres and eras. The expansion is fully customizable allowing the user to continue adjusting the kits, triggers and calibrations to best match his or her playing style.

TD-6 Elite Tips & Tricks

The **TD-6 Elite** Artists kits are programmed to match the original recordings as closely as possible by the TD-6 drum module. In order to achieve modeled accuracy, some kits may not require the ambience levels of other kits in the expansion. This modeling technique was needed to reach maximum precision. Some kits required a combination of ambience and EQ, to achieve the original recording accurately. If you wish to adjust the settings to better work with your public address system, band or recording, your module settings can be easily adjusted to add even more ambience and change the EQ to achieve the desired sound enhancement. Panning can be adjusted to widen the depth of your kit.

On rare occasions, *(as noted in the kit listing section of this manual)* ambience was added to increase the presence of the kit for more playing applications such as live performance. In the live playing environment, it is suggested that the kits be played to the mixing console as they are modeled, followed by adding the desired effects to accommodate the current environment. Regardless of importing kits individually or as an entire backup, the expansion was designed with the group faders at 75% for optimal volumes. Setting your group faders to 75% before loading your backup will yield the best results.

Thank you once again for purchasing the **TD-6 Elite Expansion Pack** from V Expressions LTD. We hope you enjoy it!
